

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Control Coffe Capsule

App URL:

<https://play.google.com/store/apps/details?id=com.microbyt.controlcoffeCapsules>

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to conduct comprehensive testing and gather detailed feedback on the app. Additionally, we reached out to some of our target users, including coffee enthusiasts, to collect real-world insights from the intended audience.

2) How easy was it to recruit testers for your app?

Answer: Easy

(You can select your own answer).

3) Describe the engagement you received from testers during your closed test

Testers engaged actively, providing valuable insights on app features, usability, and overall experience. Their feedback highlighted key areas for

improvement, leading to actionable changes that enhanced user satisfaction and interaction with the app's functionalities.

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Feedback focused on enhancing ASO, adding a dynamic walkthrough for new users, improving screenshots to showcase features, implementing dark mode, and including privacy policy pages. We collected this feedback through surveys and direct communication with testers.

5) Who is the intended audience for your app?

Control Coffee Capsule is designed for coffee lovers and users of capsule coffee machines who want to efficiently monitor capsule usage, optimize maintenance schedules, and ensure their coffee makers are functioning at peak performance for a better brewing experience.

6) Describe how your app provides value to the users.

The app helps users track their coffee capsule consumption, ensuring timely maintenance and descaling of coffee makers. By providing insights into

usage patterns, it enhances the brewing experience, promotes optimal coffee quality, and prolongs the lifespan of the machine.

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k

(You can select your own answer).

8) What changes did you make to your app based on what you learned during your closed test?

Based on user feedback, we prioritized enhancing ASO, added a dynamic walkthrough for new users, improved app screenshots to reflect key features, implemented dark mode for comfort, and included a privacy policy, thereby significantly improving user experience and compliance.

9) How did you decide that your app is ready for production?

After thorough testing, incorporating essential feedback from diverse testers, and addressing significant usability issues, we ensured the app is stable, user-friendly, and legally compliant, positioning it strongly for successful deployment on Google Play.

10) What did you do differently this time?

This time, we focused on optimizing the app's visibility by refining the description, enhancing user onboarding with a walkthrough, and improving visual assets. These strategies resulted in a more polished app that effectively meets user needs and expectations for production readiness.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

**Best regards,
Testers Community Team**
